

CUSTOMIZED SOLUTION SET FOR AIRLINES & OPERATORS

CTi developed a unique and readymade set of tools especially designed for airlines and operators to support their ongoing challenge to insure wheels up. It provides a solution that is reliable and transparent, easy to implement and guarantees that all parts sourced are delivered on time to the requested delivery address.

THE AIRLINES & OPERATORS SOLUTION SET INCLUDES:

- ONE Consolidation Point in the USA, Europe Asia and the Middle East
- AOG desk which operates 24/7 with a designated account team
- Project based full logistics and transportation support, for example C- Checks in foreign countries
- Part inspection in origin country (identifying errors in an early stage in the process)
- Storage of critical parts in key airports
- Analysis of regular routes and consolidation points maximising costs reduction /lead time optimization
- Effective management of repair orders, from origin country to repair shop
- Around the clock communication and follow up with suppliers and vendors
- Consistent high level of service from one single point of contact
- Complete visibility on stock and parts movements via CTiX
- Micromanagement of the flow door to door
