

# DROP SHIPPING SOLUTIONS

FOR THE AVIATION INDUSTRY

[Learn More >](#)

Control Towers International has developed unique transportation solutions set to manage drop shipments swiftly and efficiently – offering you a complete array of customized solutions.

Drop shipping is an increasingly utilized transportation option in the aviation industry as globalization expands and the pressure on supply chain costs and lead time increases.

Control Towers International has been fulfilling the complex requests so common in the aviation industry, helping the distributors and aircraft maintenance support companies around the world meet the tightest time frames.

We deliver a wide range of solutions for shipping everything from large parts to critical parts, from slow movers to AOG.

**Control Towers International can offer you:**

#### AOG Rush Services

With options including: same day pick up and deliveries from most international locations and services that range from door to door, expedited freight, dedicated drives, slow movers as well as VAT and Duty specialists.

#### Unique Process

Our unique process focuses on:

- Benchmarking of global routes to insure service quality and competitive rates
- Product quality through inspection
- Micromanagement of transportation process to insure on time delivery

#### Around the Clock Operation

24/7 operation from a centralized logistics control tower to meet the specific requirements of all regions of the world.

#### CTiX™ - IT System

Our Web-based system serves as your complete source of information – enabling you to place orders, get real time statuses and view proof of delivery online, as well as generate activity history and detailed accounting reports.

#### Competitive Rates

Signed Service Level Agreement (SLA) with the world largest logistics networks and carriers insure meeting our customers requirements anywhere and anytime against competitive rates.
